Talking Points for Columbia River for Elin

Dave:

You asked me for some talking points on Columbia River TMDL for a Corps/Elin meeting. Can you please give me the name of the Corps people at the meeting? - that would be helpful.

I am going to forward you an email that Mike sent to Elin on the Columbia River TMDL work effort at the end of July. Everything is current and the following bullet provides the latest update.

- EPA HQ and R10 just recently met with the Corps HQ and NW Division at the end of September in Portland, to address some of the issues regarding Columbia River temperature modeling. As a result of that meeting, we agreed to convene a technical team to start working on 1-D and 2-D modeling in the Columbia and Lower Snake River. We are currently finalizing a summary of our agreements and next steps which came out of that meeting with the Corps and Bureau. That modeling effort will be a first step to potentially move forward on the Columbia River TMDL.

Mary Lou
